DYLAN VAN PARYS

SENIOR SOFTWARE ENGINEER

dylan@vpconsultancy.be | LinkedIn | GitHub | vpconsultancy.be

PROFILE

Software Engineer with 5+ years of experience designing and developing enterprise applications. Combines strong backend engineering expertise with full-stack development capabilities, technical leadership, and end-to-end product ownership.

EXPERIENCE

BASF - Agricultural Solutions

January 2024 - Present

Software Engineer | *Ghent*

Research Decision-Enablement | December 2025 - Present

Developing and maintaining research-critical applications supporting computational biology workflows, enabling scientists to analyze genetic sequences and optimize plant phenotypes.

Common-modules | January 2024 - December 2025

Designed and developed Resource Registry, a resilient, technology-agnostic data abstraction platform managing petabyte-scale data across on-premises storage and AWS S3. Implemented reliable data replication and fault-tolerant mechanisms to ensure data availability.

Skills: Java, Spring Boot, AWS, Terraform, Docker, Kubernetes, Oracle SQL, MongoDB, Apache ActiveMQ Artemis, Bamboo Specs (Java)

Your-Tickets.be

November 2021 - Present

Technical Lead & Co-owner | *Aalter*

Leading the technical development of an event ticketing platform serving 1,000+ organizers, with over 1 million tickets sold. Responsible for software architecture, full-stack development, and AWS infrastructure. Implementing solutions for payment processing, order management, and offline ticket validation.

Skills: JavaScript/TypeScript, Express.js, React, React Native, Next.js, MySQL, Java, Spring Boot, AWS, GitHub Actions

IQGeo / Comsof

September 2021 - January 2024

Software Engineer - IT Consultant via Axxes | *Ghent*

Client Delivery Software Engineer | January 2022 - December 2023

Developed client-specific extensions to Comsof Fiber for Deutsche Telekom, AT&T, Proximus, and Telekom Malaysia. Helped establish the department's first Scrum team, improving collaboration and development processes.

R&D Software Engineer | October 2021 - January 2022

Developed and optimized core functionality of Comsof Fiber, a software platform for automated fiber-optic network planning. Contributed to backend and frontend development within a Scrum team, with a focus on algorithm optimization and performance.

Skills: Java, Spring Boot, Angular

TECHNICAL SKILLS

Languages: Java, TypeScript, JavaScript, Python, SQL
Backend: Spring Boot, Express.js, REST APIs, Apache ActiveMQ Artemis
Cloud & DevOps: AWS, Docker, Kubernetes, Terraform, GitHub Actions, Bamboo
Frontend & Mobile: React, Next.js, React Native, Expo, Angular
Databases: Oracle, MySQL, MongoDB
Testing & Practices: JUnit, Jest, Scrum, TDD

EDUCATION

Ghent University | 2016 - 2021
MSc Computer Science Engineering, *cum laude*
